

Spreadsheets are commonly used for multi-unit restaurant reporting. Unfortunately, creating and maintaining spreadsheets is time consuming, human error breeds unreliable calculations, and reports are not efficiently shared.

Mirus collects and secures any data from anywhere. Organized information can be leveraged through automated custom reports, turning your data into actionable intelligence.

What Are Your Reporting Concerns?

WASTED TIME

Stop wasting time and resources when manipulating spreadsheets.

INACCURACY

Prevent data inaccuracy due to human error.

MISSING DATA

Find missing data that causes invalid reports.

Mirus Advantages:

- See a 300% or greater return by using Mirus to leverage your restaurant data
- Improve efficiency by automating GL and payroll processes
- Create custom metrics and key performance indicators
- Save time reviewing scheduled alerts based on custom thresholds
- Secure historical data with a web based solution
- Quickly identify outliers to improve labor and fraud
- Investigate efficiently with powerful filtering and sorting features

What CFOs Are Saying

"As a CFO I was frustrated because I always had to go to IT to find out where do I get this, where do I get that. Now, I know I can go into Mirus and get the information I want. I have more confidence in the data and I don't have to rely on IT choosing the proper parameters. We've become much more analytical because we believe the numbers."

- Chris Defrain, CFO, Lehigh Valley

"We had a lot of useful data, spread across legacy systems that couldn't communicate easily. We had to spend a lot of time cutting and pasting to perform the analysis we needed. With Mirus, we review and analyze all our data, drawn from a variety of formats, and quickly focus on opportunities and problems."

- Louis Psallidas, CFO, UNO Pizzeria & Grill

"Now we can quickly access, aggregate and act on data collected from each POS system at all of our locations. In addition, we can supplement the POS data with other sources of information including service metrics, payroll, and financial data to create one repository of all relevant information from which we can report and run analysis. The system is easy to work with, intuitive, and flexible."

- Lori Whelan, CFO, PR Management

"Mirus lets you quickly build ad hoc reports that highlight the information you want, and allows you to set up your own distribution groups. Now we can highlight the information we need and get it in front of the proper groups. "

- Mark Robinow, CFO, Kona Grill
